## DETAILED ACTION

### *Drawings*

1. Figure 20 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: O (Figure 6), S, E (Figure 15), c, d, 43 (Figure 17), r1 and r2 (Figure 21). A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: D (page 24, line 20) and 42a (page 55, line 12, etc.). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
4. The drawings are objected to because of the following informalities:

- a. The sectional cross-hatching of reference numerals 30b (Figures 2 and 18), 2, 3 (Figures 8(a) and 8(b)), 4 (Figure 8(b)), 202, and 203 (Figure 19) is incorrect. See MPEP § 608.02.
- b. FIG. 8 (a) and (b) should be labeled as FIG. 8(a) and FIG. 8(b).

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

- 5. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "201" has been used to designate both "a flange" (page 9, line 22, etc. and Figures 21 and 22) and "a base layer" (page 62, line 10, etc. and Figure 19). Also the reference character "40" has been used to designate both "a highly heat conductive member" (page 23, line 2 and Figures 2, 4, 10, and 16) and "a lubricous member" (page 61, line 8, etc. and Figure 18). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Specification***

- 6. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: IMAGE HEATING APPARATUS HAVING A LIMITING MEMBER.

- 7. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is

requested in correcting any errors of which applicant may become aware in the specification.

8. The disclosure is objected to because of the following informalities:
- a. Page 7, line 20, "16" should be "16c".
  - b. Page 9, line 1, "16" should be "16c".
  - c. Page 12, line 16, "Figure 8 is a schematic sectional view" should be "Figures 8(a) and 8(b) are schematic sectional views".
  - d. Page 12, line 18, "shows" should be "show".
  - e. Page 19, line 20, "107" should be "106".
  - f. Page 59, line 16, "12" should be "22".
  - g. Page 59, line 20, "13" should be "30".
  - h. Page 62, line 24, "2" should be "202".
  - i. Page 63, line 2, "2" should be "202".
  - j. Page 63, line 3, "3" should be "203".
  - k. Page 63, line 4, "3" should be "203".

Appropriate correction is required.

***Claim Objections***

9. Claims 2-12 are objected to because of the following informalities:
- a. Claim 2, line 2, "send" is misspelled, and the correct spelling should be "said".
  - b. Claim 2, line 3, "send" is misspelled, and the correct spelling should be "said".

- c. Claim 3, line 3, "is the formed" is grammatically incorrect.
- d. Claim 9, line 2, "father" is misspelled, and the correct spelling should be "further".
- e. Claim 12, line 4, "send" is misspelled, and the correct spelling should be "said".

Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

11. Claims 1-3, 10, and 13-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Sano et al., U.S. Pat. No. 6,014,539.

The patent discloses an image heating apparatus comprising a rotatable member (fixing film) 710 or 20 contactable to a recording material 15 carrying an image T (Figures 4(A) and 8); a limiting member 71, 73, or 31 for limiting movement of the rotatable member 710 or 20 in a direction of a generating line of the rotatable member 710 or 20 (Figures 2, 3, and 10); the limiting member 71, 73, or 31 being provided with a surface opposed to an outer peripheral surface at an end portion of the rotatable member 710 or 20 (Figures 2, 3, and 10); a roller 730 or 24 contacted to the rotatable member 710 or 20 for forming a nip n (Figures 4(A) and 8); the rotatable member (fixing film) 710 or 20 being flexible; inherently, the limiting member 71, 73, or 31 being held by

a hold; the limiting member 71, 73, or 31 being made of heat-resistive resin material (column 6, lines 29-30); the rotatable member 710 or 20 having a metal layer 701 or 20a; a coil 718 or 23 for generating a magnetic field for inducing eddy currents in the metal layer 701 or 20a (column 4, lines 49-52 and 62-67); and the image T on the recording material 15 being heated by a heater (column 12, lines 49-52).

***Allowable Subject Matter***

12. Claims 4-9, 11, and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Other Prior Art***

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Setoriyama et al., U.S. Pat. No. 5,196,895, discloses an image heating apparatus comprising a rotatable heating film; a limiting member for limiting a lateral shifting force of the rotatable heating film; a pressure roller; and a heater connected to an inner peripheral surface of the rotatable heating film.

Abe et al., U.S. Pat. No. 6,049,691, discloses an image heating apparatus comprising a rotatable heating film; a limiting member (flange); a pressure roller; and a coil for generating a magnetic field for inducing eddy currents.

Hayasaki et al., U.S. Pat. No. 6,359,269, discloses an image heating apparatus comprising a rotatable heating film; a limiting member (flange); a pressure roller; and a coil for generating a magnetic field for inducing eddy currents.
